

**Title**

FAS database: first results

**Speaker, organization**

Juan ALVAREZ DE LA PUENTE, DG AGRI D2

**Abstract**

In September 2017, the Commission services proposed to build a database on the implementation of the Farm Advisory System at European Union level in order to provide a common platform to collect and share information on this issue. To achieve this objective the Commission launched at this time a questionnaire proposing a structured framework to collect all relevant data in an harmonised way. This presentation provides the first results on the data notified by Member States.
