Results audits 2012-2013 ⁽²⁾

On-the spot checks - Risk analysis

In 30% of PA's random sample reveals more error than risk based sample

- RS: In 8 out of 48 **(15%)** random > risk diff is >50%
- Classical: In 9 out of 13 **(70%)** diff is >50%

What is the cause ????

⇒ Annual evaluation ? !

Results audits 2012-2013 ⁽³⁾

On-the spot checks - Remote sensing

- In 34 out of 44 PA's (**75%**) classical OTSC reveal materially more error than RS OTSC.

Avg diff. is 228% but sometimes >500%

- In 10 PA's RS OTSC reveal more error than classical

Avg difference is 43%

AND NOW ?
